1. GENERAL APPEARANCE

Typeset title in 10pt Times roman uppercase and boldface. Typeset names of authors in 9pt Times Roman, uppercase and lightface. Use footnotes only to indicate if permanent and present addresses are different. Funding information should go into the Acknowledgement section. Typeset affiliations and mailing addresses in 9pt Times Italics.

If you prefer to use microsoft word to produce your paper, we recommend that you use our ms-word 6.0/7.0 style/template file (medical.dot) which conforms to the required typeset specifications. The instructions on how to use the World Scientific ms-word style/templates are detailed in the medical_readme.doc file. If you are using tex/latex, please download the respective style files available from our web site at: www.wspc.com.sg

1.1. Producing the Hard Copy

Contributions to the proceedings will be reproduced by photographing the author’s submitted typeset manuscript. It is therefore essential that the FOUR PAGE manuscript be in its final form, and is an original computer printout, because it will be printed directly without any editing. The manuscript should also be clean and unfolded. The copy should be evenly printed on a high resolution printer (300 dots/inch or higher). If typographical errors cannot be avoided, use the cut and paste method to correct them. Smudged copy, pencil- or ink text corrections will not be accepted. Do not use cellophane or transparent tapes on the surface as this interferes with the picture taken by the publisher’s camera. The manuscript will not be reduced or enlarged when filmed, so please ensure that figure/table captions and other small point sizes of text are legible.
1.2. Using Other Word-Processing Packages

If you intend to use some other word-processing software packages to construct your manuscript, other than those packages mentioned in the abstract above, and are using the final hard copy version of this file as guidelines, then please follow the style given here for headings, table and figure captions, and references. The size of this volume measures 8.5 by 6 inches (21.5 by 15.25 cm); however, you should submit the copy on standard A4 paper. The text area, which includes the page numbers should be 7 by 4.7 inches (17.75 by 12 cm). The body text should be in 10pt roman. It is also important to reproduce the spacing of the text and headings as shown here. Text should be slightly more than single-spaced; use a baselineskip (which is the average distance from the base of one line of text to the base of an adjacent line) of 13 pts. Use 10 pts for footnotes. All headings should be separated from the text preceding it by a baselineskip of about 26 pts, and use a baselineskip of about 18 pts for the following text.\cite{3-6}

Paragraphs should have a first line indented by about 0.25 in (6mm) except where the paragraph is preceded by a heading. The abstract should be indented on both sides by 0.25in (6mm) from the main body of the text.

1.3. Heading, Text, Lists and Tables

Please preserve the style of the headings, text fonts and line spacing to provide a uniform style for the proceedings volume.

The tables are designed to have a uniform style throughout the proceedings volume (Table 1). We would prefer the border lines to be of the style shown in the Table 1. The caption headings for the table should be placed at the top of the table.

<table>
<thead>
<tr>
<th>Name</th>
<th>January</th>
<th>February</th>
<th>March</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mike Jones</td>
<td>20553.00</td>
<td>28036.00</td>
<td>35550.00</td>
</tr>
<tr>
<td>Pam Coburn</td>
<td>9177.00</td>
<td>9980.00</td>
<td>11000.00</td>
</tr>
<tr>
<td>Mike Jones</td>
<td>20553.00</td>
<td>28036.00</td>
<td>35550.00</td>
</tr>
</tbody>
</table>

1.3.1. Lists

Lists may be laid out with each item marked by a number, lowercase letter or a bullet:

1. Item one  
   (a) Item one  
   • Item one
2. Item two  
   (b) Item two  
   • Item two
3. Item three  
   (c) Item three  
   • Item three
3. Item four  
   (c) Item four  
   • Item four, etc
1.4. Figures

You can embed/link the various formats of images into the document and produce the pages as single camera-ready copy. If you wish to use some other methods, then it is very important to leave the correct amount of vertical space to accommodate your figure. It is advisable to have an empty box to indicate the correct size of the figure which can be pasted later (Fig. 1). Send the hard copy figures on separate pages with clear instructions to match them to the correct space in the final hard copy text. Please ensure the final hard copy figure is correctly scaled to fit the space available (this ensures the figure is legible.)

The caption heading for the figure should be placed below the figure as shown in Fig. 1.

![Figure 1](image_url)

Fig. This is a caption for figure one. This is a caption for figure one. This is a caption for figure one. and one.

Acknowledgements

If you wish to have acknowledgements to funding bodies etc., these may be placed in a separate section at the end of the text. Note that there is no section number for the Acknowledgements.
References

References must be submitted in the correct style for this volume. The references will be listed in numerical order as they appear in the text. The References section should be placed at the end of the text. Within the text, the references will appear as superscript numerals according to the sequence they appear in the text. Authors must pay particular attention to the accuracy of references, which should be checked before final submission of the finished manuscript. The following are some examples of references.

Journal Articles:

Books:

Chapters in Edited Book:

With the listing at the end as follows:
